

TIDAL

Amplified Streaming Audio Player

The TiO StealthStream 1 (AZSS1) is the most versatile and powerful digital audio zone player on the market. The AZSS1 gives you easy access to all of today's popular digital music services - it supports Airplay and GoogleCast that streams music from your favorite portable device.

The AZSS1's stealth design is a marvel of modern engineering and technology. With an integrated 100 watt amplifier, the AZSS1 provides big high resolution audio sound, but still fits in the palm of your hand. In fact, it's so compact, it will install into a standard one gang in-wall box - using the same wiring and mounting hardware of the old volume control it replaces.

The AZSS1 is a part of the complete TiO ecosystem providing synchronized playback in multiple rooms - and the audio quality will delight even the most hard core audiophile. And, it can now even work as a standalone product, without a full TiO ecosystem.

Analog Audio Output

Outsource your sound to an external amplifier or home theater receiver or even use it as a wireless extender for your powered sub woofer.

Music Everywhere

With multiple AZSS1's installed in your home, you can listen to the music you want, where you want. Since each AZSS1 is a dedicated streamer, you can enjoy Jazz in the kitchen, punk on the porch and classical in the office - all at the same time.

Party On!

With StealthStream® the AZSS1 can synchronize up to 6 rooms wirelessly and control them from a single location to cover all your party needs. You can even have multiple StreamShares active at the same time.

Mounting Options

The AZSS1 is small enough to hide under a sofa or dresser or on a bookshelf. You can put it on a desk or bedside table. You can even install it in the wall in a single-gang wall box. The choice is yours!

Cloning is for more than Sheep

When an AZSS1 is configured as a Clone of another AZSS1, the source selection and volume is controlled from the primary AZSS1 - perfect for

You and your Shadow

When an AZSS1 is configured to Shadow another AZSS1, the source follows the primary, and the volume is controlled separately. This works well in Master bedroom/master bath installs where they play the same music.

TiO Captures your Mood™

Set the perfect music for an elegant dinner party, or have your patio music turn on half-an-hour before sunset everyday. You decide, then Capture the Mood you want with the press of a single button.

Go Small or Go Home

The AZSS1 is the smallest full-featured audio zone player in the world. The days of needing big amplifiers that take up a lot of space to get big sound are over.

Plenty of Power

Don't let the small size fool you - this is a serious amplifier. **100 Watts** of Class D power for crystal clear high-res audio fidelity.

Superior Audio Quality

The AZSS1 supports streaming of lossless, uncompressed music all the way up to **24bit/192kHz**.

Network-Based Music

The AZSS1 plays music stored anywhere on your network - including your iTunes music.

Streaming Music Services

The AZSS1 has streaming music services inside. With TuneIn radio, Sirius XM, Napster, Spotify, Tidal, Deezer, AirPlay, GoogleCast (Q1 2017), and more coming, you have access to all the music you could ever want to play.

Optical Audio Input

Connect your TV, Satellite Receiver, DVD player or other digital source to your AZSS1 and listen in one room or throughout your entire home.

Auto-Switching

The AZSS1 is smart enough to automagically switch to the proper input when your digital source is turned on.
